WITH VIGA GEMILANG

CiTest **Leptospira** IgG & IgM Rapid Test

Tropical Diseases Range

- ✓ Fast Results in 10 minutes
- ✓ Simple Procedure
- ✓ Suitable for all Geographies
- ✓ High Accuracy

Analytes	Sensitivity	Specificity	Accuracy
IgM	90.0%	98.6%	98.3%
IgG	93.8%	98.7%	98.3%

- Leptospirosis is an infectious disease caused by *Leptospira*, that are transmitted through animal urine to humans. It is therefore a zoonosis. The most common animals that spread the disease are rodents. People often get in contact with animal urine through water or soil containing animal urine with breaks in the skin, eyes, mouth, or nose. Person-to-person transmission is rare.
- Leptospirosis occurs worldwide but is most common in tropical and subtropical areas with high rainfall. The disease is found mainly wherever humans come into contact with the urine of infected animals or a urine-polluted environment. A major risk factor for development of the disease is occupational exposure, such as agriculture.
- *Leptospira* IgG/IgM Rapid Test offers fast and reliable results for *Leptospirosis* diagnosis in suspected cases for faster medical decisions resulting in better patient care.
